edu use to create a domain name system hierachy for organization with a focus on education

int is a specialized domain offering registrations solely to intergovermental organisation

net such as internet service providers and other infracture companies

dns is turndomain name into ip addresses which use to load internet pages.You need to load it so browser can load internet resources.
(WHY DNS IP IS IMPORTANT?) To allow users to load internet reesources.

(why should i use dns?)

its not only user friendly but also work sommothly loading whatever content we ask for quickly and efficiently.

the domain com is a top level domain (TLD) in the domain name system of the internet it can be used in choosing a domaine name

org is use for nonproft websites open sources projects
